EDUCATION

University of Florida, Herbert Wertheim College of Engineering — Expected May 2028

*B.S in Computer Engineering, GPA: **3.85*** — *Gainesville, FL*

Awards: Dean's List (All Semesters)

TECHNICAL PROJECTS

Flight Telemetry Simulator — **2026**

Personal Project

- Developed a Python-based simulator to emulate real-time rocket telemetry data.
- Enabled bidirectional communication between flight controller and ground station.
- Implemented wireless data transfer using Digi XBee radios.
- Tested and validated telemetry accuracy for mission readiness.

The Blinker — **2025**

Coursework

- Designed and built an interactive reaction-time game using Arduino, LEDs, buttons, and LCD display.
- Implemented I²C communication between multiple microcontrollers for input handling and game logic.
- Integrated hardware and software to optimize responsiveness and user interaction.

Portfolio Website — **2025**

Personal Project

- Designed and developed a personal portfolio from scratch using HTML, CSS, JavaScript.
- Applied responsive design principles for accessibility across devices.
- Showcased technical projects and work experience professionally.

The Last Flower – Blossoming Studios — **2024**

Personal Project

- Designed dynamic weather systems and environmental effects.
- Developed AI models with chase and flying behaviors using Unreal Engine 5, C++, Photoshop.
- Published and demoed a game, showcasing teamwork and project completion.

TECHNICAL EXPERIENCE/CLUBS:

Space System Design Club — **Feb 2026 – Present**

University of Florida

- Built a Python flight simulator for rocket telemetry.
- Enabled real-time communication between flight controller and ground station.
- Implemented wireless data transfer using Digi XBee radios.
- Tested and validated telemetry accuracy for CanSat mission.

Blossoming Studios — **Aug 2024 – Jan 2026**

President | **August 2025- Jan 2026** — *Santa Fe College*

- Led a student-run development team across programming and design.
- Developed gameplay systems using C++ in Unreal Engine 5.
- Managed project execution and cross-functional collaboration.

Society of Hispanic Professional Engineers — **Aug 2025 – Present**

University of Florida

- Engaged in professional development and STEM networking initiatives.

WORK EXPERIENCE:

Junior Staff Intern – BTR Consulting — **Nov 2023 – Aug 2024**

Miramar, FL

- Supported audit projects and report generation.
- Assisted daily office operations, demonstrating organization and attention to detail.

TECHNICAL SKILLS:

Programming: Python (Intermediate), C++ (Intermediate), HTML/CSS/JavaScript (Intermediate).
Embedded/Hardware: Arduino, I²C Communication, Circuit Design, Hardware Troubleshooting.
Tools/Software: Unreal Engine 5, Unity, Onshape, Microsoft Suite.
Other: Real-time systems, wireless communication, telemetry systems.
Languages: English (Fluent), Spanish (Fluent).
